

§ 1126.53

of skim milk in receipts of concentrated fluid milk products from other pool plants that are assigned to Class I use, an amount equal to:

(i) 95 percent of the pounds of skim milk in receipts of milk at the transferee-plant from producers and handlers described in § 1126.9(c); and

(ii) The pounds of skim milk in receipts of packaged fluid milk products from other pool plants;

(2) Assign any remaining pounds of skim milk in Class I at the transferee-plant to the skim milk in receipts of bulk fluid milk products from other pool plants, first to the transferor-plants at which the highest Class I price applies and then to other plants in sequence beginning with the plant at which the next highest Class I price applies;

(3) Compute the total amount of location adjustment credits to be assigned to transferor-plants by multiplying the hundredweight of skim milk assigned pursuant to paragraph (b)(2) of this section to each transferor-plant at which the Class I price is lower than the Class I price at the transferee-plant by the difference in Class I prices applicable at the transferor-plant and transferee-plant, and add the resulting amounts;

(4) Assign the total amount of location adjustment credits computed pursuant to paragraph (b)(3) of this section to those transferor-plants that transferred fluid milk products containing skim milk classified as Class I milk pursuant to § 1126.42(a) and at which the applicable Class I price is less than the Class I price at the transferee-plant, in sequence beginning with the plant at which the highest Class I price applies. Subject to the availability of such credits, the credit assigned to each plant shall be equal to the hundredweight of such Class I skim milk multiplied by the applicable adjustment rate determined pursuant to paragraph (b)(3) of this section for such plant. If the aggregate of this computation for all plants having the same adjustment rate as determined pursuant to paragraph (b)(3) of this section exceeds the credits that are available to those plants, such credits shall be prorated to the volume of skim milk in Class I transfers from such plants; and

7 CFR Ch. X (1–1–97 Edition)

(5) Location adjustment credit for butterfat shall be determined in accordance with the procedure outlined for skim milk in paragraphs (b) (1) through (4) of this section.

(c) The Class I price applicable to other source milk shall be adjusted by the amounts set forth in paragraph (a) of this section, except that the adjusted Class I price shall not be less than the Class III price.

[40 FR 23438, May 30, 1975, as amended at 47 FR 54422, Dec. 3, 1982; 56 FR 52447, Oct. 21, 1991; 58 FR 27890, May 11, 1993]

§ 1126.53 Announcement of class prices.

The market administrator shall announce publicly on or before the fifth day of each month the Class I price and the Class II price for the following month, and the Class III and Class III-A prices for the preceding month.

[60 FR 6612, Feb. 2, 1995]

§ 1126.54 Equivalent price.

If for any reason a price or pricing constituent required by this part for computing class prices or for other purposes is not available as prescribed in this part, the market administrator shall use a price or pricing constituent determined by the Secretary to be equivalent to the price or pricing constituent that is required.

§ 1126.55 Credits to handlers for transporting surplus milk.

For each of the months of March through June and December 16–31, a transportation credit shall be computed for each handler on the amount of producer milk that is classified as Class II or Class III pursuant to § 1126.42 (b)(3) or (d)(2) that such handler transfers or diverts to nonpool plants located outside the State of Texas. Credits established pursuant to paragraphs (a) and (b) of this section shall be computed at the rate of 2.4 cents per hundredweight for each 10 miles, or fraction thereof, for the shortest hard-surfaced highway distance, as determined by the market administrator. The amount of milk eligible for a transportation credit and the amount of such credit shall be established in accordance with paragraphs (a), (b), and (c) of

this section subject to the limitations specified in paragraph (d) of this section.

(a) A transfer credit shall apply to bulk fluid milk products transferred by a handler from a pool plant located in Zone 1 of the marketing area for the distance between the transferor pool plant and the transferee nonpool plant.

(b) A credit for diverted milk shall apply to milk produced in Zone 1, 1-A, or 3 of the marketing area or the Oklahoma counties of Atoka, Bryan, Carter, Choctaw, Comanche, Cotton, Greer, Harmon, Jackson, Jefferson, Johnston, Kiowa, Love, Marshall, McCurtain, Murray, Pushmataha, Stephens, or Tillman that is diverted to a nonpool plant for the distance in excess of 100 miles between the nonpool plant and the nearer of the city hall in Dallas, Texas, the pool plant of last receipt for the major portion of the milk on the route, or the courthouse of the county where the major portion of the milk on the load was produced.

(c) A credit for diverted milk produced in the area specified in paragraph (b) of this section shall also include an amount per hundredweight equal to the difference between the location adjustment (excluding any plus adjustment) applicable in the area where the milk was produced and any greater minus location adjustment applicable at the location of the nonpool plant where the milk was received.

(d) No credit shall apply to the total quantity of milk moved to a given nonpool plant by a handler during each of the credit periods if any portion of the milk is assigned to Class I. Also, the amount of milk to which a credit would be applicable during each of the credit periods pursuant to paragraphs (a), (b), and (c) of this section shall be offset by the amount of milk that a handler or any affiliate of the handler causes to be received at plants located in the marketing area from outside the State of Texas during each of the credit periods, with such offset to be applied in sequence beginning with the nonpool plant at which the greatest credit would apply.

[53 FR 39445, Oct. 7, 1988]

UNIFORM PRICE

§ 1126.60 Handler's value of milk for computing uniform price.

For the purpose of computing the uniform price, the market administrator shall determine for each month the value of milk of each handler with respect to each of his pool plants and of each handler described in § 1126.9(b) and (c) with respect to milk that was not received at a pool plant as follows:

(a) Multiply the pounds of producer milk and milk received from a handler described in § 1126.9(c) that were classified in each class pursuant to §§ 1126.43(a) and 1126.44(c) by the applicable class prices, and add the resulting amounts;

(b) Add the amounts obtained from multiplying the pounds of overage subtracted from each class pursuant to § 1126.44(a)(14) and the corresponding step of § 1126.44(b) by the respective class prices, as adjusted by the butterfat differential specified in § 1126.74, that are applicable at the location of the pool plant;

(c) Add the amount obtained from multiplying the difference between the Class III price for the preceding month and the Class I price applicable at the location of the pool plant or the Class II price, as the case may be, for the current month by the hundredweight of skim milk and butterfat subtracted from Class I and Class II pursuant to § 1126.44(a)(9) and the corresponding step of § 1126.44(b);

(d) Add the amount obtained from multiplying the difference between the Class I price applicable at the location of the pool plant and the Class III price by the hundredweight of skim milk and butterfat assigned to Class I pursuant to § 1126.43(d) and the hundredweight of skim milk and butterfat subtracted from Class I pursuant to § 1126.44(a)(7) (i) through (iv) and (vii), and the corresponding step of § 1126.44(b), excluding receipts of bulk fluid cream products from an other order plant and bulk concentrated fluid milk products from pool plants, other order plants and unregulated supply plants;

(e) Add the amount obtained from multiplying the difference between the Class I price applicable at the location of the transferor-plant and the Class III
